PR-13-2-100-1/8-6-E, EXPP-3CU-24S-25 wire, OTP-U-M connector, sold separately.

OMEGA® jack panels are for use with RTD's, thermistors and shielded thermocouples. Using the TJP snap-in panel jacks, the same versatility given to thermocouples is now possible for sensors requiring 3 lead wires.

The snap-in jacks have 3 female terminals that will accept any 3 prong OTP male connector. They can accommodate wires up to 14 AWG and are made from alloys to match ANSI thermocouple grade calibrations.

The TJP panel jacks are made of rugged, high impact plastic, and have a maximum service temperature of 205°C (400°F). They are mounted in 2.4 mm (3/32") panels of anodized aluminum.

**Note:** Male plugs can be supplied in place of the female jacks on all OMEGA panels, if desired.

**Note:** All OMEGA TJP jack panels are assembled at no extra cost!
